

Looking for
high quality medical products?

You have an idea for
a **medical** product?
... and want to **bring it to life?**

BIEGLER
MEDIZIN ELEKTRONIK

Innovative

Flexible Supportive

Ingeborg Biegler
Managing Director

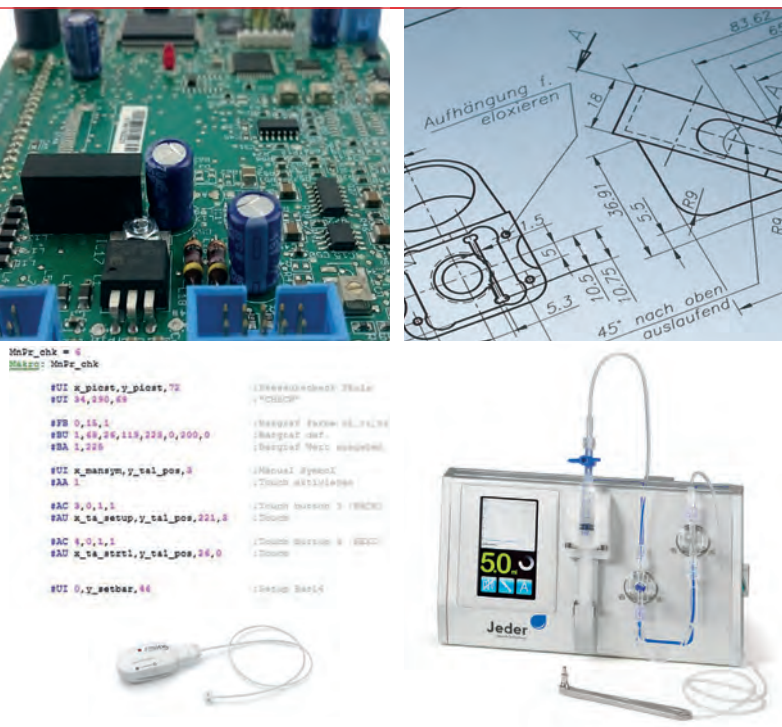

Werner Biegler
Managing Director

Company introduction

- Founded in 1973, Biegler GmbH has more than 40 years experience in development and manufacturing of medical products
- Turn-key service from product ideas to certified medical devices and consumables
- Innovative solutions in the medical field
- Close to the market with worldwide distribution network through local partners
- EN ISO 13485 certified and FDA registered

From ideas
to products

In-house
manufacturing

Development

Development of medical devices as core competence with in-house engineering

Highly qualified and experienced developers to cover the entire spectrum from initial concept through to implementation in serial production

Combining the knowledge of our customers with our own expertise to enable the effective realization of projects

Technology fields

Design and Construction

- CAD / CAM, rapid prototyping

Mechanical production

- State-of-the-art CNC lathes and milling machines

Tool building

- Tooling production for automation

Injection molding

- Medical thermoplastic injection molding

Electronics

- Printed circuit board design and software development

Assembling

- Series production of medical devices and consumables

Innovation
through partnerships

OEM development
partner

Product range

Warming of blood and infusions

Multipurpose devices for blood, infusion and transfusion warming

Pressure infusion

Medical device to administer fluids under constant pressure

Neurostimulation

Electrical nerve stimulator

Respiration Therapy

Individual training device for the inspiratory muscle

Dental Equipment

Minimal invasive sinus lift

Laboratory Equipment

Development and production in cooperation with research centers

Consumables

Manufacture, assembly and packing of consumables

OEM Services

- Providing turn-key service with years of experience bringing products to market
- From the first design phase to the finished medical product
- Integration of diverse technologies
- Long-term trusting partnership

Clean room manufacturing

Access to the market

Clean room

- Assembly and packaging of consumable products in clean room
- Integrated process controlled manufacturing
- Sterilization of products with EtO or gamma irradiation by system partners

Regulatory affairs

- Authorization of medical devices up to Class III
- QM system in accordance with EN ISO 13485
- Fulfillment of technical and regulatory requirements
- Support for CE and FDA certification

Customer support

- Long-standing experience, quality and service
- Advice in the event of queries and suggestions
- Safety checks and periodic inspections
- Targeted and market-oriented solutions
